
4MP 120-Day Entry Plan

Russell Dudek | VP of AI candidate vision for 4MP | Page 1 of 3

Operating objective

Prove one correction loop and install the system for many. Increase authority only after measured evidence, named ownership, rollback, and an explicit hold condition.

4MP 120-Day Entry Plan

Russell Dudek | VP of AI candidate vision for 4MP | Page 2 of 3

Days 0-30: Instrument the problem

Choose one correction class; map intent, state, coordinate frames, data lineage, economic consequence, authority, hold, and rollback.

Days 31-60: Close a narrow loop

Build replay or simulation, shadow inference, human review, correction proposal, post-action measurement, and incident review.

4MP 120-Day Entry Plan

Russell Dudek | VP of AI candidate vision for 4MP | Page 3 of 3

Days 61-90: Stress the boundary

Vary machine state, tool, material, programming style, operators, environment, sensing, and failure modes.

Days 91-120: Install the compounding system

Translate proof into team design, data architecture, model-physics-rule ownership, simulation roadmap, hiring, and portfolio governance.
