Candidate thesis

Make every correction explainable, bounded, validated, and reusable. 4MP needs an intelligence and operating architecture that connects manufacturing intent, physical machine state, metrology, physics constraints, human authority, validation, and reusable learning.

Immediate contribution

Physical systems and telemetry. Agentic workflow and human authority. High-reliability manufacturing and root cause. Cross-functional mechanisms connecting engineering, operations, quality, customers, and adoption.

Vape-Jet - Director of Operations - 2025-Present

Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows. Works in a robotics and machine-vision environment with approximately 1,000 fielded robots.

DudeWorth - Founder / AI and Automation Advisor - 2017-Present

Designs AI-readiness systems and agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.

Compunetics - Director of Operations and Engineering Management - 2000-2013

Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.

Complementary depth

ZeusVu: led regulated autonomous drone operations with a 100 percent safety record and no FAA incidents; developed TensorFlow-based aerial inventory and computer-vision concepts.

Amazon: built launch, throughput visibility, escalation, labor planning, and standard-work mechanisms in 24/7 operations supporting approximately five million second-day orders annually.

Scientific foundation

University of Pittsburgh, Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

Credentials

Google AI Essentials; Food Safety Management Certification; IBM Enterprise Design Thinking Practitioner; Six Sigma Certification; OSHA 10.

Toolkit

Agentic AI, LLM workflows, RAG patterns, human-in-the-loop design, Python, SQL, JavaScript, TensorFlow, Tableau, ERP/Odoo, Jira, HubSpot, Slack, GIS and mapping workflows.
